

Screening of CO Waiver Registry

Ernest Le
Money Follows the Person
December 6, 2017

MARYLAND
Department of Health

Goals of the Screening

- Gather information about the registry population
- Clean up contact information for the registry
- Remove individuals who are no longer eligible for waiver services (e.g. passed away, moved out of state, joined a different waiver)

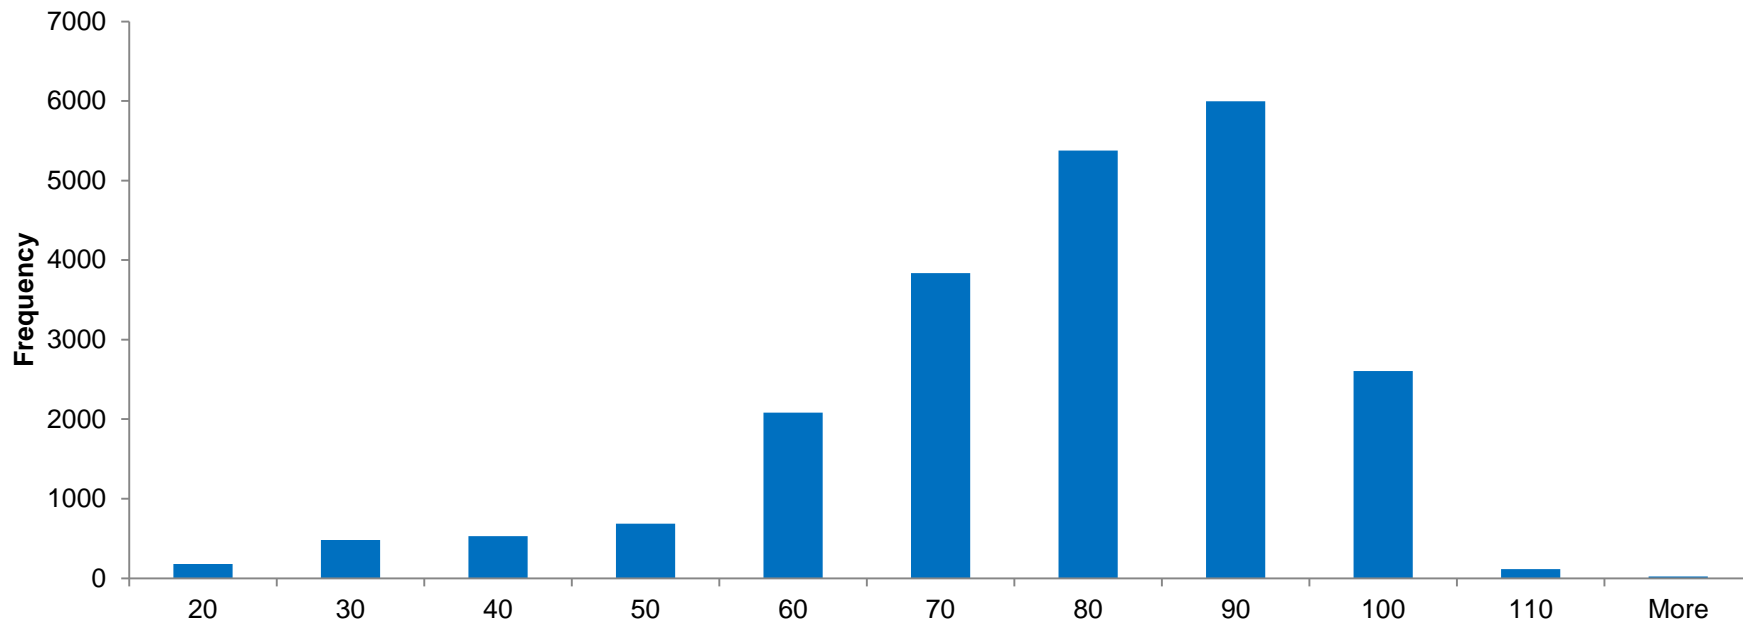

Progress By the Numbers

- The Waiver Registry has 21,900 individuals
- 12,000 individuals have received the Level One Screen
- Several hundred individuals still need follow-up
- Schaefer Center will submit another progress report at the end of this month

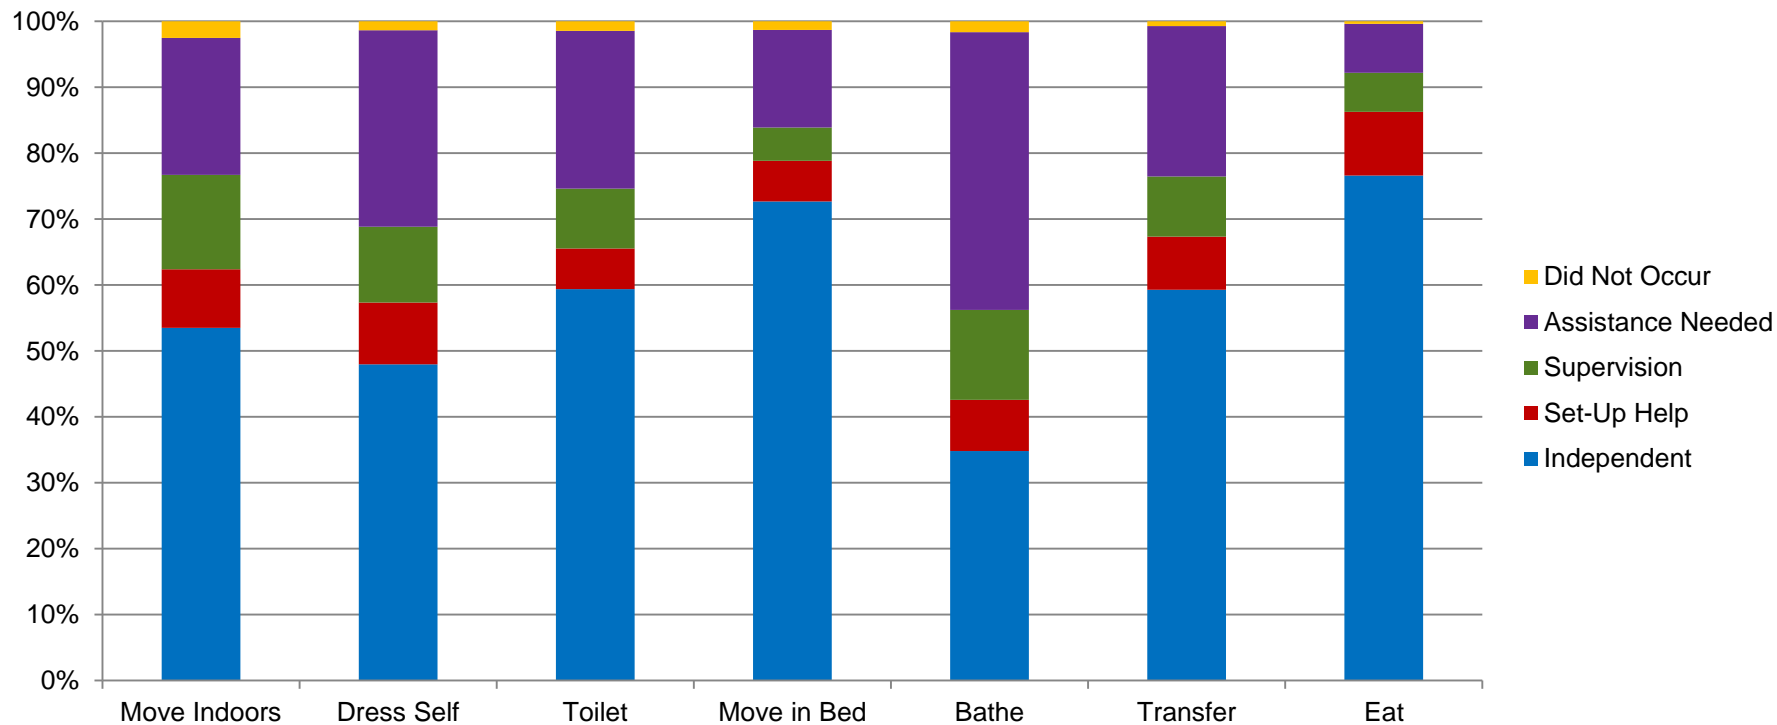

Death Match

- Comparison against Vital Statistics Administration records turned up about 2,000 matches
- Most of these records have been deactivated, but the remainder need to be examined and processed by a human worker
- Previous death match was two years ago

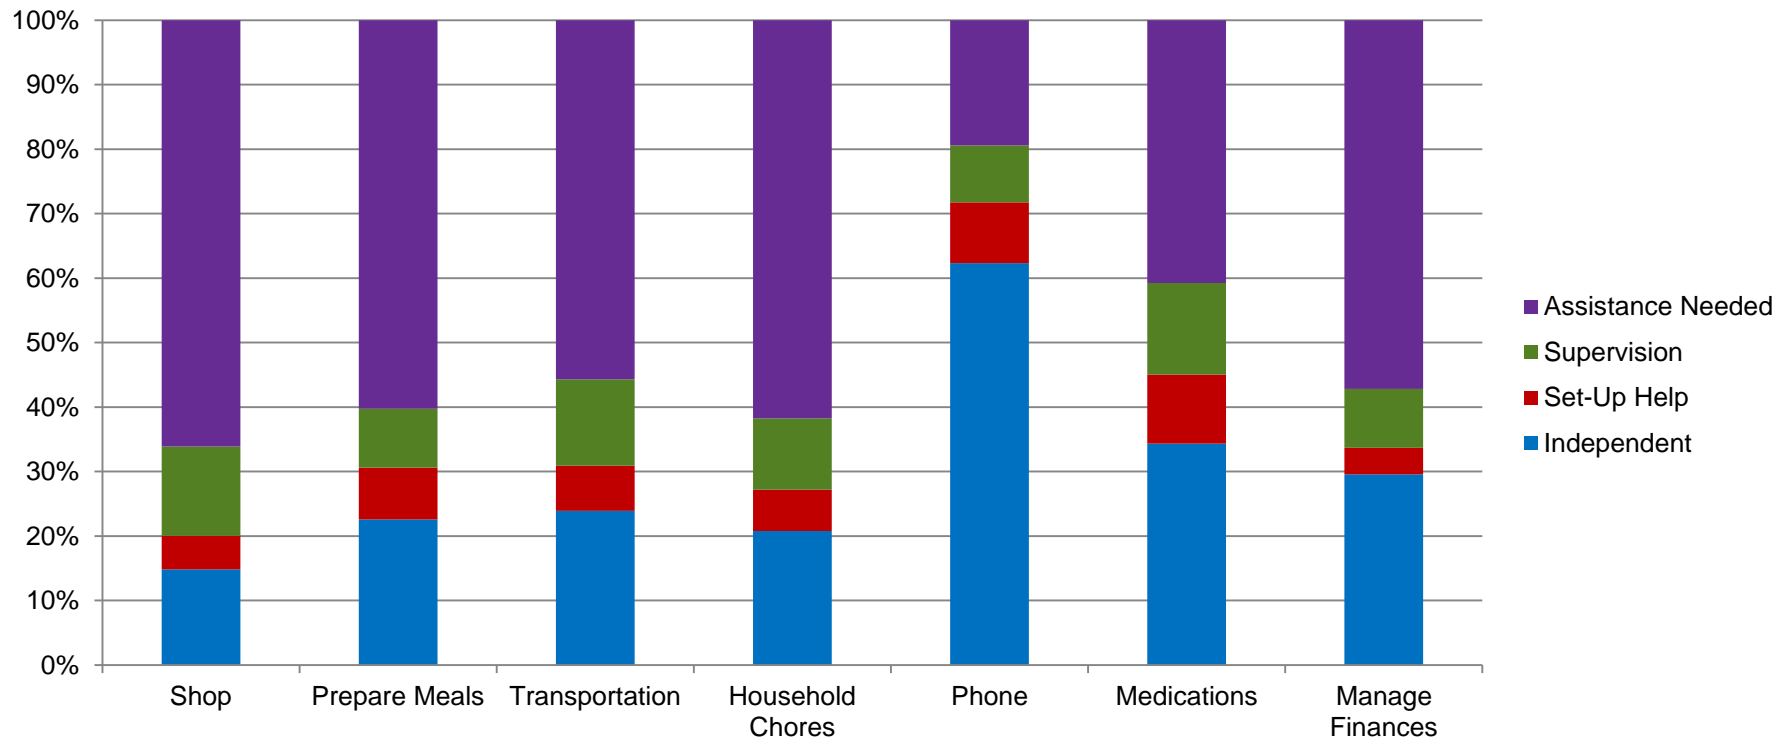

Waiver Registry Age Distribution

Screen Results: ADL

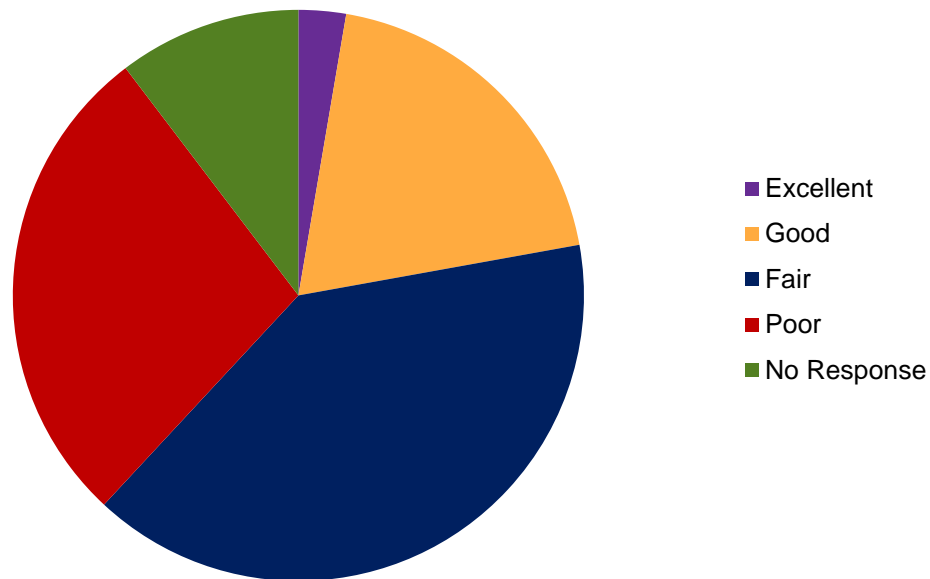

Screen Results: IADL

ADL and IADL Analysis

- ADLs tend to be strongly correlated
- IADLs less consistently correlated

Self-Reported Health

What Next?

- Continued follow-up (individuals on CFC will remain on registry)
- Schaefer Center calls to finish by end of FY18
- Hilltop Institute will analyze screening data to create new score
